Introduction

This ebook is simply an observation of many things that millions of Americans appear to be concerned about and many are MAD.

There is more and more evidence of what appears to be the New World Order fighting for dominance. Thousands of people have a strong belief the Illuminati, freemasons, the Bilderberg Group and other secret societies are moving their chess pieces into place. Corruption in America and around the world is not getting better, matter of fact, by all accounts it appears to be worse now than any other time in history.

This is not a compilation of my belief system, as I'm only the messenger. I want you and others to know that you're not alone in your thoughts and your anger concerning the issues of today appear to be shared.

My hope is; most or all of these conflicts and troublesome issues will vanish before I die, however, I'm a realist and I sincerely doubt if I or anyone for many generations will see and experience a peaceful world. This makes me sad.

MEDICAL - HEALTH

Disease: We are lead to believe in this day and time there are no cures for diseases like Cancer, Diabetes, Heart Disease or others? Do you think cures are purposely kept from the American people? If so, would this make you mad? Would make you mad if disease and most illnesses are part of profit making business?

Medical Costs? Why should it cost \$100 to \$400 to consult with a doctor up to fifteen minutes? Unless you have cancer or something equally as bad, the health care system in the US sucks. The World Health Organization ranked the US 37th in the world for health care, despite the fact that we spend the most per capita by a large margin. A routine STD test can COST you over \$200 in the US is free in many countries to anyone, citizen or not.

Medical Health Care: Many Americans who voted for Obama are mad about Obama care and they believe they were lied to. Many Americans are paying twice or three times more for their health insurance now. Some companies do not allow employees to work over a certain amount of hours in order to avoid paying employee health insurance. This causes Americans to earn less money. Does this make you mad too?

Cancer : Why is cancer an epidemic after \$50 million per year researching for the cure? It has been determined B17 is a cure for cancer. B17 is now outlawed in the USA for curing cancer? Does this make you mad?

Medicine: Does it make you mad that nearly all medical books are written by the pharmaceutical companies? Does it make you mad that most medical doctors are never taught how to heal the body using natural medicines?

Surgery Costs? People are starting to question the actual costs for surgery. Many types of medical surgeries may only take one to three hours. Why should surgeries cost thousands of dollars.....up to \$100,000 or more? Do you think this is a fair price to charge the customer? Many people have lost their houses in order to pay their surgeon and hospital expenses. Are you mad?

CONTROVERSIAL – POLITICAL

Politicians: Does it make you mad how corrupt our politicians are? Do you believe it's possible they mostly get elected on lies? Does it make you mad that most politicians become wealthy while in office?

Global Warming: Fortunately, not one of Al Gore's global warming predictions came true. All were false. Al earns billions of dollars giving speeches on Global Warming. Does it make you mad that over one hundred scientists have proven global warming is not caused by humans and has not and will not affect the healthy standard of living? The UK will not allow Al Gore's film be seen in their country without a warning to viewers that says the theory is not true or factual. But yet "THEY" want to charge a carbon tax anyway? People say we should follow the "money" trail and see WHO will benefit from this tax. The most respected and most knowledgeable and educated scientist on Global Climate debunks the Global warming hoax. Expert says the WRONG formula was used to prove the Global warming situation. If this is true....would this make you mad? IT'S A FACT.

Democrats – Republicans: Does it make you mad that there isn't hardly any difference in these two parties? Does it make you mad that most politicians play a "role" or lie and "act" like there is a difference? Does this make you mad too? Are Americans simply fools?

Division: Does it make you mad that many American organizations are funded for the sole purpose of creating division and chaos in America and other parts of the world? Are there any organizations funded to create peace? Does this make you mad as hell?

Insurance: Does it make you mad that mandatory laws are created to force you to purchase a product called insurance or you are punished and fined?

Terrorists: It's impossible for most human beings to think logically in a continuous state of fear. Experts say that terrorism is usually created by the CIA to carry out their own agenda? Do you think this is false? If it's true, would it make you mad?

Presidents: Does it make you mad that our election system is set up to "select" a president not elect a president? Does it make you mad that Americans have been fooled into thinking they have a choice?

Terrorism: Thousands of Americans are mad how CIA created ISIS for their own agenda. Does this make you mad too? Does it make you mad that there has always been a boogey man created for the American people to keep you in an emotional state of fear and to bring about new laws that reduce your freedoms?

Illegal Immigrants and Open Border. Some people want America to remove it's border. The definition of a country is this;– Borders/Language /Culture. If any region lacks these aspects, then it's usually not called a country. Does it make you mad that our government servants are allowing our border to remain somewhat open?

Most countries protect their borders, this is called a country. A region without borders is NOT a country.

Does it make you mad that hundreds of known terrorists have already entered our country from Mexico? Does it make you mad that Mexican drug cartels are earning BILLIONS of dollars smuggling drugs across our borders and poisoning our youth and the morals of the American citizens? Does it make you mad that Mexico releases thousands of criminals from their prisons and they walk across our borders while committing crimes in America as well? Does this FACT matter to you?

US Government Servants

DID YOU KNOW THESE FACTS? Automatic pay raises. Every year, our congress members members of Congress receive an automatic cost-of-living increase in their pay, which is now **\$174,000 per year**—about 3.4 times as much as the average worker earns. Many Americans would be absolutely excited to earn the same amount of money they did a couple of years ago, instead of getting by on reduced pay or part-time work that doesn't cover all the bills.

Members of Congress Receive Golden Benefits: Very few Americans receive a full pension, their health benefits DECREASE every year and many companies evade the cost of benefits by hiring part-timers and independent contractors instead of full-time staffers. **Members of Congress are eligible for two types of retirement plans** and a retirement healthcare plan that in nearly every way are more generous than benefits typically offered to private-sector workers. In Congress's version of a 401(k) plan, for example, Uncle Sam (funded by taxpayers) matches contributions up to 5 percent of pay, while in private-sector plans the company match is usually 3 percent--and some companies don't even offer matching funds anymore.

The fringe benefits for members of Congress are worth about \$82,000 per year—which raises total compensation to well over **\$250,000**. There may be a retirement crisis in many parts of America—but not on Capitol Hill.

Meanwhile the approval rating of our Congress men and women are below 10%. Are you mad yet?

Dumbing Down of Americans

Americans Have at their Finger tips a Massive Resource for Facts and Information. Why are a Large Population of the US so Ignorant and some say “Stupid”?

As an American, I’m almost ashamed to include this portion in this book, however, it’s important for it to be known. The American school system makes some people very mad.

Many Americans may be proud of their country, the United States of America, although if the majority of people took stock of the level of stupidity and willful ignorance of the population they might be embarrassed for their country, America and more importantly, be ashamed of themselves for being so ignorant.

Our school system and the curriculums creates stupid people: Change what our children learn and behave and a more knowledgeable population will occur. Millions of people are mad about Common Core, even many school teachers. Common Core is obviously a disaster and hopefully will be tossed out.

Most Americans are not considered retarded – they simply lack knowledge and a reason to learn and retain. Yes, they are STUPID. Plus, believe it or not, it’s popular and cool to be DUMB and ignorant. Many bullies in schools will punish kids who are trying to learn. This is all by design. The dumbing down of Americans!

A report in 2007, the Intercollegiate Studies Institute discovered that on average 14,000 randomly selected college students at 50 schools around the nation scored under 55 (out of 100) on a test that measured their knowledge of basic American civics. Surprisingly, seniors often tested lower than freshmen. (The explanation was apparently that many students by their senior year DID NOT retain what they learned in high school.)

The optimists point to surveys indicating that about half the country can describe some differences between the Republican and Democratic Parties. But if they do not know the difference between liberals and conservatives, as surveys indicate, how can they possibly say in any meaningful way how the parties differ? And if they do not know this, what else do they not know?

Most Americans do not understand the mechanics of government. 65% DO NOT know that Congress declares war (which may explain why they are not alarmed when presidents take us to war). Only 65% DO NOT know that Congress can override a presidential veto. Some 49% think the president can suspend the Constitution. Some 60% believe that he can appoint judges to the federal courts without the approval of the Senate. Some 45% believe that revolutionary speech is punishable under the Constitution.

America ranks 2nd in IGNORANCE. According to the research firm IPSOS Mori, the United States ranks second out of fourteen countries in general ignorance about social statistics such as teen pregnancy, unemployment rates, and voting patterns. Italy is the most ignorant of the fourteen countries. Americans rank almost last in knowledge with the rest of the civilized world. **Does this make you mad?**

Why is Home Schooling So Popular?

The average cost to home school is about \$500 per year per child. The average cost to educate a child in public school is nearly **\$10,000 per year!** There are many reasons that more and more parents are homeschooling their children. Here's one big reason. **87%** of students in public schools score LOWER than homeschooled students.

One of the biggest reasons that homeschooling is becoming so popular is the perception that public schools are becoming more dangerous. Many parents do not believe the public school system is a safe environment and some parents do not want their children influenced by the wrong people or children at an early age.

The 10 best and most freedom states for homeschooling listed below:

1. Alaska
2. Connecticut
3. Idaho
4. Illinois
5. Indiana
6. Michigan
7. Missouri
8. New Jersey
9. Oklahoma
10. Texas

There are also now many more options for homeschoolers than before. The availability of everything from curriculum to home school playgroups to accredited distance-education home school programs all have made it so that homeschooling is becoming more popular.

There are more home--school play groups, more curriculum choices, and more options in general. In other words, as homeschooling becomes more popular, the things that make it popular will continue to grow as well. It's a lot of work for a parent, but homeschoolers say it's more than worth it. The minds and hearts of their children is important to them.

Homeschooling is legal in the U.S., but different states grant varying degrees of freedom to homeschooling families. There are many people in our government who do not want our children to be homeschooled. They actually prefer all children to be educated in the public school system.

Most of the government officials who are against homeschooling provide private education for their children. As of now, there are eight states in which homeschooling families often find that it's difficult, but not impossible, to keep up with all of the requirements necessary to educate their children at home. Are you mad?

FIREARMS - POLICE – PRISONS

Prisons: Does it make you mad that America has more people in prison than all the other countries combined? Why so many prisoners? Does this make you mad?

Prisons : Does it make you mad that most of the prisons are profit making enterprises owned by private corporations and aim for a continuous 98% filled rate? What if some of the judges are corrupt and are secretly paid to send people to prison? Would this make you mad too? Sometimes a judge makes a decision that leaves others mad and scratching their heads. Do you think that sometimes a judge's decision is based on "cash" ?

Police: Does it make you mad that many counties have "Policing for Profits" in affect? The highway patrol or police can legally remove and steal any cash they find in your vehicle. Does this make you mad?

Firearms: Does it make you mad the 2nd amendment is being eroded away? Does it make you mad that the cities with the highest murder rates by guns also has the highest gun restrictions? Criminals have guns and law abiding people are unable to defend themselves. Cities with the lowest murder rates by guns invite law abiding citizens to own and carry firearms. What's wrong with this picture? Does it make you mad too? Do you think it's strange or a coincidence that most mass shootings happen in gun-free

zones, such as: schools, churches, military bases, Universities and work-places? Are gun free zones really a safe place to be?

There have been over 1,000 shootings in Chicago so far this year, in 2016. ***Not a single shooter was a member of the NRA! Does this make you mad too?***

Police Corruption: Thousands of people have been victims by the police. Everything from police brutality, rape to robbing people at gun point. Police corruption exists in nearly every town and city in some form or another. New Orleans police department recently received an award for the most corrupt. Two of their officers are on death row. Over all police officers have killed over 5,000 people since 9/11. Police have been corrupt for many years, it's nothing new. They steal money from motorists, create traffic traps for unethical revenue collection and they even have been caught stealing property from resident's homes. Are you mad too?

Police vs. Citizens: Does it make you mad that the media is creating a division between the police and the citizens? Most people do not trust the police. Do we need the police if our firearms are removed from law abiding citizens? Will the police be anxious to help us? Are the police our friends?

TAXES - BANKS –IRS – FEDERAL RESERVE

United States of America: The country, America, is actually a corporation and not really a country. The corporation is called United States of America, Inc. Every state is also a corporation. Every city, ever police department, fire departments are also corporations. There are approximately 190,000 corporations under the umbrella of the United States of America, Inc. We are often called a land of Corporations.

Corporations perform several functions. They employ people, corporations loan money, corporations are used for law suit protection. Most corporations usually are incorporated to earn PROFITS.

Federal Reserve: Millions of people are discovering for the first time the secrets of the Federal Reserve. It was in acted in 1913. Most people believe it's a Federal agency and is part of our Federal government. No, this is not true. It is a private bank. The board of directors are a few of the most wealthiest people on the planet. They determine interest rates and create the US money supply.

The Federal Reserve is in the business of loaning money to the United States Government, Inc. The Federal Reserve earns HUGE profits. What would a bank be without interest rates for profit? Each American with a social security number is collateral for those massive LOANS. It's been said, the American people pay about 20 billions dollars per day in interest to this private bank called the Federal Reserve. Not one penny of income taxes are used for paying the cost of our government or to repair

our infrastructure. The Federal Reserve Bank is unable to be audited. Senator Ron Paul tried, but was unsuccessful. Are you mad yet?

IRS: The Internal Revenue Service is not part of our government. It is a collection corporation hired by the private Federal Reserve Bank. The IRS mostly utilizes fear tactics to collect money from the American people and corporations for the fake Federal Reserve debt that they say is owed. All IRS liens and seizures are illegal. The IRS in its totality is a violent, criminal extortion racket with no legal basis whatsoever. Many people are calling for the abolishment of the Federal Reserve Bank and it's outlaw "bully", the IRS. Are you mad yet?

IRS : Americans fear the IRS, just like some people fear the Mafia. IRS agents carry weapons and spread fear. Does it make you mad they use fear to collect your money? Does it make you mad that not one penny of your income tax goes to help repair America or in any way pay for the salaries of our government employees or political servants? Does this make you mad? Where does all this money go?

Banks: Two or more of the largest banks in America have been fined for laundering drug money. One was fined a mere \$3,000 for laundering 500 million dollars in DRUG MONEY. Question: How many times would you rob a bank for \$100,000 if the fine for getting caught was only \$20?

Banks: Thousands of Americans are mad at banks. Several banks have been caught foreclosing on houses and properties with false documentation even though the property showed a clear title. A popular bank has been known to foreclose on properties even without proof of title or ownership. Does this make you mad too?

Property Tax: Millions of people believe paying property taxes is CORRUPT. Cities can function very well without charging property taxes. The school districts can run very efficiently from different sources of income tax schemes. Property taxes could be equated to paying *rent* on property you *own*. In a nutshell, more government theft and a loss of property rights. One person said, “We don’t even use the public system, yet I am being forced to pay all this money into a public school system,” Many people are mad about having to pay rent for property they own. Does this make you mad as well?

Property Tax Corruption: A growing number of people are losing their homes to [fraudulent tax lien](#) procedures. Stories come from all over the country, and the federal government has [convicted](#) some county treasurers of conspiring with realtors, lawyers, and judges to rig phony homestead exemption fees, late fees, and penalties. This scheme seems to be growing. Does this make you mad?

Bank Corruption: Banks and the foreclosure scam. When the housing bubble burst in 2008 and 2009, banks rushed to foreclose on millions of Americans so they could turn a quick profit and get the homes and properties back on the market and repeat the cycle all over again. But in their mad frenzy for ever more money, banking officials began foreclosing on millions of home and business owners that weren’t in default.

In many cases, homeowners had never fallen behind on their mortgage payments. In other cases, the borrowers had paid off the bank in full years ago and they owned their homes and storefronts completely. And in thousands of other instances, banks foreclosed on people that weren’t even their customers. None of those people should have lost their homes. But millions of them did anyway. And since nobody was ever

arrested or prosecuted for wrongly throwing millions of innocent people on the streets and stealing everything they had, the practice continues to this day. Are you mad?

GOVERNMENT SNOOPERS? Government Over Reach?

The NDAA: The [National Defense Authorization Act](#) which was passed in 2012 and extended in 2013 and 2014, authorizes the U.S. military to arrest anyone, anywhere on the planet, to deny them access to a lawyer, and to detain them indefinitely without a trial. Furthermore the U.S. government claims the right to do all of this in secret.

The right to a fair trial, is gone, and without the right to a fair trial, you have no rights at all.

Of course some would argue that the NDAA only targets enemies of the United States and the NDAA also applies to citizens of the United States of America.

It doesn't matter who the law claims to target, and it doesn't matter under what conditions the politicians claim it can be used. If you don't have the right to a lawyer, and you don't get your day in court, and if the government isn't even obligated to disclose the fact that they dragged you from your house in the middle of the night, then who is going to make sure this isn't abused? The soldiers? The politicians? Come on.

The power to make someone disappear without a trial is the power to make up any excuse that's convenient. Evidence is only needed if you have to prove your case in court. Does this make you mad yet?

The UTAH Data Center: Millions of people are concerned and many are mad about the government snooping capabilities. This is the largest data storing facility in the

world. It is large enough to store every email, every phone conversation and every TEXT of the American people or anyone in the world. It's a giant snooper facility. The center will be fed data from the agency's eavesdropping satellites, overseas listening posts, and secret monitoring rooms in telecom facilities throughout the U.S." Are you mad?

Smart Meters: Smart meters utilize wireless technology and instantly tell power companies how much electricity a home is using, and even can report on the power usage by individual appliances. Smart Meters have the capability to surge your power at peak times. This increases your energy bills. They will be able to spy on everyone. They can view and listen to those with new appliances.

Former CIA Director David Petraeus once stated that WiFi-connected devices, such as appliances commonly found inside many homes, will "transform the art of spying." Petraeus also said that spies will be capable of monitoring Americans without going inside the home or perhaps even acquiring a warrant.

He went on to state that remote control radio frequency identification devices, "energy harvesters," sensor networks, and small embedded servers all connected to an Internet network will be all that is necessary for clandestine intelligence gathering. Does this make you mad?

The US Government is Stockpiling Ammunition: Stockpiling of Ammunition while Limiting the Rights of Citizens to Purchase Ammunition. Millions of people are mad about this. The 2nd amendment is for the American people to bare arms and to protect themselves from a brutal and tyrannical government. Mad?

TSA : The TSA at our airports and other transportation hot points are simply a method to get the American people used to being patted down and frisked. It is also created to get children used to being touched by strangers. Are you mad that hundreds of guns and hazardous materials were NEVER found by the TSA. Are you mad?

Agenda 21

This concept is brought about by the United Nations. (UN). The concept is to bring all people into the cities. Individual land ownership will not be allowed. Owning water rights or any growing of food will be unlawful. The USA is adopting this concept in many areas. Many people are being forced off of their land by the government. People are being almost forced to live in nearby cities, instead of living on their own land. The EPA (Environment Protection Agency) has stolen many water rights from people or made it difficult for any land owner to own a water supply. Are you mad yet?

The EPA protects the interests of big business, not the interests of the environment.

Many people have been victims of the EPA and feel the EPA is a corrupt organization. It seems to have the interests of big corporations above the interests of the environment. Because it is a governmental organization, politics do influence decision making at the EPA. Large corporations gain political influence because they have large amounts of money, and many large corporations object to stricter controls on pollution, etc. These large corporations can use their political power to influence the policies that the EPA puts into place and enforces. In conclusion, the EPA is supposed to protect the environment, but it is influenced by the people/corporations that it is supposed to police, so according to the victims of the EPA, this organization is corrupt. Are you mad?

WATER SUPPLY – FOOD SUPPLY –

Food Supply: Does it make you mad that Monsanto, the largest food provider for the American people, designed a toxic procedure called GMO in their products. It's an insecticide based ingredient. Americans are consuming large amounts of these products and it's been proven to cause a host of diseases and ailments. Our government servants allow this evil company to earn huge profits while poisoning Americans. Does it make you mad that many other countries DO NOT allow GMOs in their food supply? Matter of fact, Monsanto is not allowed to exist at all.

Water Supply: Does it make you mad that our water supply is full of toxins, poisons and is not safe to drink? Does it make you mad that our public servants allow these toxins to be dumped into our water supply?

Fluoride: This toxic substance is inserted into nearly every city's water supply. Some states, who care about the health of their citizens have outlawed it. Hitler inserted this same toxic chemical into the water supply in Germany, during WWII. Toxic Fluoride has been known to reduce IQ and create many types of ailments. Today you can read the fine print on toothpaste that warns people not to ingest this harmful chemical. If so, call poison control. Does this make you mad?

WAR ON DRUGS?

How's that War on Drugs Working for U? Millions of people are laughing at this so-called War on Drugs now. The American people feel duped. As it stands today, more than half of Americans currently in prison are there for drug-related offenses. (The vast majority of drug offenses are simply related to the possession of drugs.) According to Time magazine – about 1.66 MILLION AMERICANS were arrested on drug charges. That was in 2009. It's now seven years later.

Despite employing harsh sentences for drug offenders, it has repeatedly been found the War on Drugs has not stopped the use of drugs. After the American tax payers paid 1.5 trillion dollars on the effort between 1970 and 2010, drug addiction has remained at the same rate. Are you mad too?

Drugs: So, how is the war on drugs doing? Not so good from what is known.

Do you know that most of our prisons are filled with non-violent citizens who use or sell drugs? Does this make you mad? Does it make you mad that our government servants want to control what another human being ingests into his own body? How about all of those who benefit from keeping certain “drugs” illegal?

Drug Profits?: Who profits from the war on drugs? Let's follow the MONEY trail.

First of all, in many cases, attorneys earn a huge amount of money defending their clients who are arrested with a drug offense. The courts earn huge profits by charging fines and court costs to drug offenders. Police earn huge profits by confiscating drugs and so-called drug money. Finally, the prison industry earns huge profits by charging the STATE to house and feed those convicted of a “drug” offense. Many experts say by

ending the drug war it would put an end to this multi-BILLION DOLLAR money trail .
Are you mad yet?

MEDIA

Media: Millions of Americans no longer trust the Media. The media is no longer expected to deliver factual news. Journalists lecture us on what to believe and declare which opinions are allowable.

They lie, they spin and they brazenly ignore their own industry's stated ethical standards.

Many journalists are powerful. A well-known web journalist has vastly more influence than a junior member of the House of Representatives. Yet we don't elect journalists. Politicians are held accountable for wrongdoing regularly. Journalists are accountable to no one.

If journalists were lawyers or doctors, the worst offenders could be brought up before a professional tribunal and have their licenses revoked. No such oversight exists in media, nor could it ever.

The corporate own Media continuously feeds the American people disinformation. Millions of Americans are sick of it and no longer trust the media to provide accurate facts. Does it make you mad our corporate owned media lies to us and creates division? Millions of people do not trust the Media to provide facts and the truth. Does the corrupt Media make you mad too?

Truth Journalists Die an Early Death: There are several journalists who are not owned by the corporate Media who seek the truth. Many of them have been found dead of mysterious causes. Does this make you mad?

MILITARY

Military: Many Americans, especially the military are mad because their benefits and the size of our military units are being drastically reduced. Many military men and their families use food stamps. China has the largest Army in the world. Our military defense is no longer the strongest military. Many military experts say US does not have the capabilities to win a long term war if needed. Are you mad about this?

Military Men are Billed by Gov't for Their Purple Hearts? The physical, mental and emotional toll of these multiple tours of duty should not be underestimated. It is absolutely unprecedented in U.S. history for so many men to be sent back into frequent combat situations so repeatedly. The price of this foolishness could potentially be felt throughout our society for decades to come.

Record Number Of Suicides: The fact that many of our soldiers are spending way too much time in active war zones is a big reason why military suicides are so HIGH.

The stress of combat duty builds up over time. The physical, mental and emotional fatigue that comes with serving in combat is immense. Many soldiers see their marriages end, and others are left with severe physical and mental disabilities.

At some point many serving in the military cannot take it anymore and they commit suicide. During ONE month in July, there were 56 suicides in the U.S. military in just 31 days.

That is absolutely disgraceful, but very little is being done about the underlying causes of these suicides.

Paying To Get Your Medal? Many U.S. soldiers return home from war only to find that they are being billed by their own government. Service men pay a 21 dollar shipping fee to get their Purple Heart. VA employees are actually **paid bonuses** for denying claims. Does this make you mad?

Veterans: Our military veterans are almost ignored by our government servants. Military veterans often get the worst medical care – even though this is a promise given to them. Thousands of military veterans are homeless and need assistance – but our government servants ignore their needs –even those who have been injured. Does this make you mad?

SPORTS CORRUPTION

Sport is a multi-billion dollar business. It has detailed and complicated ties to political and private interests. This means MASSIVE opportunities for corruption. Most Sports deals and decisions take place behind closed doors. This allows obvious corruption to go unchecked and unpunished.

Corruption in sport has many forms. Referees and players can take bribes to fix matches and they do. Club owners can DEMAND cash kickbacks for player transfers. Companies and governments can rig bids for construction contracts.

Organized crime is behind many of the betting scandals that have barely spoiled sport's reputation. PLU money laundering is widespread. This can take place through sponsorship and advertising arrangements. It could also be through the purchase of clubs, players and image rights. Complex techniques are used to launder money through football and other sports. These include cross-border transfers, tax havens and front companies.

Every sport has performed corruption. Sports is a 30 BILLION dollar ANNUAL gambling industry! Do you think there is SPORTS is corrupt? OF COURSE. Are you mad?

Join the Movement. Corruption is NOT Tolerated.

Seek out people with:

- Integrity
- Good Character
- Honor
- Loyalty
- Compassion
- Empathy

I wish a wand could be waved on corruption and it will all disappear forever. However, unfortunately it will not be that easy. Most corruption in any area of life is due to mostly narcissistic sociopaths and psychopaths. These type of people are always dishonest liars, steal and manipulate to get what they want from others. They do not have any empathy or compassion for people. They are physically unable to provide these emotions. They are parasites on society. They serve ONLY themselves.

Many will even murder to get what they want. These are highly intelligent people and society needs to discover their traits in order to avoid them and keep them from being elected into public office and keep them from excelling within corporations. These people must be terminated from society and not placed in any position of power.

In my opinion, the above scenario will never happen in my life time or yours. The human race has not evolved enough to allow this to happen. Narcissistic sociopaths have got an incredible grip on our political structure, our corporations and nearly ever position of power.

I have a dream of the human race being eradicated of narcissistic sociopaths. Until then, we can only do our best to avoid and protect ourselves from these evil creatures.

This ends my words on these issues for now, but I will always be thinking of the time I wrote this ebook. I'm glad you were here to read it and if you're MAD and concerned about the future of America, then maybe you have a right to be.

Thanks again.
